

**Your passkey to
the world's romance*

There is no other radio like Hallicrafters. Its precision construction and skillful engineering will bring you superb performance on the short-wave bands plus fine reception of your favorite broadcast programs. These world-famous precision instruments have been sold in 89 countries, used by 33 governments. They are remembered by veterans, prized by experts, and preferred by radio specialists throughout the world who want a radio that is all radio.

Due to a variety of natural causes, short-wave programs cannot be heard with the same regularity as standard broadcasts. Atmospheric changes, sun spots, the movement of storms, the season of the year, the time of day, etc., all affect short-wave reception. If you are unable to get the stations you want, try other short-wave bands for stations that may be "coming through." The principal short-wave stations in the world are listed in this folder. You will be amazed how many you can receive on your Hallicrafters.

SHORT-WAVE STATION LISTING

Note: More Active Stations in Bold Type
